

## SAP HCM-Development

Development, Extension and forms in human resources management

# SAP HCM-Development | Development in human resources management

Do you want to implement SAP HCM (Human Resources) or enhance your existing SAP HCM system? Do you want to create your own infotypes in PA, PD or OM? Do you need specific HCM forms such as payroll, letters, etc.? Or do you need customer-specific logic in your SAP HCM system?

We can help you with this, because we are very familiar with the topic of development in SAP HCM.

Especially in human resources management, there are many specific technical approaches and frameworks for extending the system to cover the usually complex requirements.

If you want to store and edit additional information in your SAP HCM system, in Personnel Administration (PA), Personnel Development (PD) and Organizational Management (OM), we support you in developing your own "infotypes".

We always extend your system as close to the standard as possible. If we do have to bring in an extension/development, we always do so with state-of-the-art development. You can rely on that! We think ahead and secure your investment through sustainable architecture and programming.

If you need adaptations to forms, or even want to develop your own forms, we are also the right partner for you in all technologies: SAPScript, SmartForms, SAP Forms by Adobe, etc. Here we have decades of experience - even in very complex scenarios.

We are happy to extend missing or insufficient functionality in your SAP HCM with the means provided by SAP AG for this purpose: We implement UserExits, BADI's, Enhancements and even play notes for you.

You need specific reports or lists? We will be happy to advise you and develop useful reports that make your work easier.

Do you want to automate operational processes? We are also SAP workflow specialists.

Take a look at our flyers on the topics of SAP HCM authorizations and SAP HCM interfaces and find out where else we can provide you with optimal support in the SAP HCM area.

Contact us and ask for a non-binding discussion on the topic with our specialists. We are happy to be there for you and look forward to meeting you!

## Our offer

We talk together about your requirements and find the best solution for your company.

Together we extend your SAP HCM system sustainably and always under the most modern programming paradigms.

We develop HCM infotypes, reports, forms, logics, workflows - we are there for you technically holistically.

With us, you have the partner for your SAP development that you really need and that offers you sustainable benefits.
