

SAP HCM-Interfaces

Interfaces in human resources management

You want a sustainable and modern programming of your interface?

You have SAP HCM in use or are planning to implement SAP HCM?

We may be able to cover your requirement on the spot with one of our "ready-to-use" software products!

You want to connect an external system to your SAP HCM system in a sensible, stable and automated way?

SOAP, XML, http(s), (S)FTP, Odata, REST, JSON, IDOC's, Text, DB-Link, RFC, ICF...

You need a strong partner to support you in technical consulting and realization of your interface?

SAP HCM-Interfaces | Interfaces in human resources management

You want to implement SAP HCM (Human Resources) or connect your existing SAP HCM system with an external system via a technical interface? Your interface should be cost-effectively, stably and in consideration of the latest programming paradigms and format standards?

We can help you with this, because we are very familiar with the topic of developing interfaces in SAP HCM.

Particularly in human resources management, there are very often external peripheral systems for handling specific tasks outside the SAP system (electronic personnel dossier, time recording, applicant management, pension fund, accident reports, etc.). In order to work in a meaningful and integrated way, you need a data interface so that your systems can "communicate" automatically. We will gladly and professionally design and implement these interfaces on the SAP HCM side for you!

We might even be able to cover your requirement right away - with one of our "ready-to-use" software products like the "[HCM Cloud Connector](#)". Take a look at flyers of this product or contact us. Together we will find the optimal way to connect your systems.

Interfaces often have to meet certain requirements and especially technical standards. We know them all: SOAP, XML, http(s), (S)FTP, Odata, REST, JSON, IDOC's, Text, DB-Link, RFC, ICF, Gateway, etc.

We always build interfaces as close to the SAP HCM standard as possible so that your investment is sustainably protected and the costs of your interface are minimized - and we do this in design, implementation and operation.

Modern "state-of-the-art" development in SAP systems and especially interfaces are our core competencies. Benefit from our existing SAP HCM knowledge, which enables us to take a holistic view of requirements and solutions. We even maintain long-term partnerships with providers of external systems, who include and distribute our interface products in their software packages as standard SAP HCM adapters.

Take a look at our flyers on "[SAP HCM authorizations](#)" and "[SAP HCM development](#)" and find out where else in the SAP HCM area we can provide you with optimal support.

Contact us and ask for a non-binding discussion on the topic with our specialists. We are happy to be there for you and look forward to meeting you!

Our offer

We talk together about your requirements and find the best solution for your company.

Together we connect your SAP HCM system with external systems sustainably and always under the most modern programming paradigms and format standards.

We can probably cover your requirements immediately with one of our "ready-to-use" software products.

With us, you have the partner for your interface development that you really need and that offers you sustainable benefits.
