

## Interfaces

### Are your peripheral systems connected via efficient and correctly set up interfaces?

We offer profound knowledge of the interface technologies EDI, ALE, IDOC as well as communication via REST, Json, Odata, Soap and XML and can also advise and implement according to complex specifications.

Our portfolio includes products that communicate flexibly via aforementioned technologies and can also be set up individually for customers. Due to the high flexibility a wide range of partners can be connected.

### Our service:

- Connection of peripheral systems via EDI, ALE or IDOC
- Communication via REST, Json, Odata, Soap and XML
- Possibility of connections via our interfaces, developed as a product
- Individual development of interfaces with the mentioned techniques and formats
