

Easy ALIS Service transfer (ALIS-Connect)

Are you familiar with these
problems?

Do you have the SAP
IS-H solution for health
care?

Are you sure that all
services have always
been adopted?!

You would like to
transfer performance
data in test mode
(connection to new
conversion system)
from time to time?

Do you not use
SAP IS-H for
performance, but for
administration and
billing?

A large part of the
services is created
outside the SAP?

The SAP interface
(RNCGET1oXML) for the
transfer of services is
too complicated and
static for you?

Easy ALIS – Service transfer (ALIS-Connect)

Why does "Easy ALIS" improve and increase the quantity of transferred services from different peripheral systems in a proprietary system landscape and thus increase the quality of billing?

Almost all SAP customers, which use the healthcare solution of SAP IS-H, use the SAP standard 'RNCGET10XML' for service transfer.

With the help of this somewhat outdated interface, services from a variety of systems, such as care, laboratory, pharmacy, etc. are adopted according to IS-H. There is no useful billing without services.

Missing services can lead to incorrect billing and thus to a nasty surprise. The billable benefits are not transmitted to the corresponding costs unit. There is a risk that the caring institute remains at these costs.

Often, missing or under-transmitted services can also be "unconsciously" lost.

Our solution offer

"Easy ALIS" makes it easier for you to transfer services from your peripheral systems. For "Easy ALIS" it doesn't matter where exactly you store your services. Whether on a directory of the SAP application server, the path of a shared network drive or via the local instance.

The services in XML format, the standard of ALIS-connect, are read in without any problems. All previous versions are supported.

The automation of the transfer of ALL services in batch mode is guaranteed by the generic processing of directories. No more files or services are lost.

If desired, transferred files can be archived in a separate directory. A complete traceability of the data is guaranteed. Lost and unfortunately unpaid benefits belong to the past.

Services of a new conversion can be used in the test mode and thus checked without booking.

Our Offer Easy ALIS

One-time license
CHF 9'500

Annual maintenance
(21% of the one-time license)
+ Access to updates and
guaranteed release capability
CHF 1'995

Rental price incl. maintenance
CHF 5'795 / year
