

**2getHR**  
Are you familiar with these problems?

## The challenge

Imagine you could save HR process costs through digitization and make your processes faster and more transparent. Bring your users up to speed with the latest user interface (UX) technology and let your employees decide which device they work on.

**Cross-device compatibility is mandatory today and guaranteed with us.**

Your employees enter their personnel data independently, which relieves your personnel administration.

Wage statements, reports and expense receipts are sent securely online, which saves you a lot of paperwork.

Vacation and absence requests are submitted digitally by your employees and approved by you, keeping you and your employees on top of current vacation balances.

Working time records are recorded on your smartphone or PC and are immediately available for accounting in HR.

In addition, there is the possibility of a trustee access, which allows you an uncomplicated and fast cooperation with your trustee.

## Our solutions offer

With the **2getHR** we support you in the digitalization of your HR processes.

This intelligent interface solution understands the language of both applications and contains a large predefined set of data to be transmitted, which can be supplemented and customized in each case. All fields used in **2getHR** are predefined in the interface and can be controlled individually.

Your SAP data as well as documents from SAP can be transmitted to **2getHR**. Data maintenance is done on 2getHR and is synchronized back to SAP.

The interface thus offers you the flexibility you need to use SAP data optimally in **2getHR**.

## System requirements

You have SAP HCM/HXM in use.

The **2getHR** is available from release ECC 6.0.

Do you need more information or would you like a free demo - call us or contact us via email.

We are here for you.
