

## SAP scale connection

Are you familiar with these problems?

# SAP scale connection

## The challenge

Speed up and automate your processes by installing and configuring your industrial scales directly in your SAP landscape. The automatic recording of weights increases your process efficiency and avoids incorrect entries. This ensures a consistently high quality.

The integration of the scales is possible across modules. Use the connection in production, warehouse management or in your own developments. With the decision tables from the Business Rule Framework, you have a comprehensive tool at your disposal to adapt your scales according to your needs and to integrate them operationally. No additional middleware is required; data is transferred via standardized interfaces. For communication we rely on the Websocket protocol, which is based on TCP. It is a reliable and connection-oriented protocol.

Increase your process efficiency thanks to the integration by automatically recording the weights. Add plausibility checks to further increase quality. The integration can be flexibly adapted to your use case. Together we will find the ideal solution for your scenario.

## Our solutions offer

With the **SAP scale connection**, we support you in the digitalization and automation of your processes. We make the necessary settings on the system side. If you wish, we can train your employees on the system so that you can make simple adjustments yourself in the future.

Our solution offers seamless integration into the SAP standard and creates real added value for your ERP system. Thanks to our **SAP scale connection**, you transfer the data directly to SAP. Automate weight recording and increase your process quality. Control and adjust your scales centrally. We support the industrial scales of the leading manufacturers and integrate them via your existing network. Increase the efficiency and productivity of your employees.

We integrate your scales into your existing processes or design new processes and dialogs together with you.

Call us or write to us. We are here for you.
